SUPREM SERIES groundbait present a wide range of colors. They have enough nutrients to obtain the appetite's stimulus of the fish. They also contain vitamins, attractors, additives, colourings and carp smell. Ready to go fishing! All the GROUNDBAITS POISSON FENAG have the possibility of be complemented with our doughs, additives or pellet , all of them prepared to work together. In that way, we'll get the fish bite faster.

DOUGH HOOK- PATÉ

To the finished mix of paste-paté It's not necessary to add anything more, because its composition allow it to endure in the fishhook without need manipulation. We find these dough hook paté in different flavors. All of them provide carps with those nutrients that they need in its habitual diet: calcium, hydrates, proteins and vegetables. For an improvement in the final aspect add a few Attractor Carp's tea spoonfuls in the mix.

To the finished mix of Masas-Carp we will add a proportion of water so we can obtain an appropriate viscous aspect for every fishing time (the more stormy the water is, the more compact the dough). We will find different flavors: banana, strawberry, vanilla, barbel and tench. We can join The Masas-Carp with the SERIES SUPREM ground baits or CARPES and PLATINUM SERIES because the lack of nutrients ground baits have, can be provided by Masas-carps. The result will be surprising.

BOILIES' EXTRACT

Soaked concentrated special to form a liquid cap in the surface of the boilies. We will leave in soaking the boilies a few hours before the fishing, in order that the flavor wrap the boilie and enter in the pores. We will observe that a film in the surface of the boilie has been created and that will be dissolved for the water. It'll expand a strong flavor in our zone of fishing stimulating appetite for big carps.

Dried Groundbaits for sea have an amino acids base, and correctors who stimulate the appetite of fishes and contribute as an effective decoy.

Sea fishes such as breams, gilded, sea basses, mullets...needs in their usual diet animal protein as crushed sardine groundbait, but also calciums of the rocks, vegetable proteins of seaweeds and the rinds of crustaceans. All this components can be found in any formula of our Saltwater groundbaits.

All the products of POISSON FENAG are the result of experiments and tests realized by our team for many years. We offer a new series of attractive, balanced and very digestible groundbaits. The selection of fresh and first quality flours allows us to have a fresh bait and ready for using in any type of circumstance.

OILS

The oil of sardine for its proteinic components are specific for fishing. It's advisable for any mix of wet or dried groundbaits or doughs thanks to its natural oily fat. Nowadays it is a basic product in any pantry of a fisherman, for making doughs, reinforces the smell of the pellets or a complement for ground baits. The fish oil is a natural component that will surprise you in any circumstance of fishing. In the other hand, it is possible to choose a more complete range, like blood of fish, sardine oil, anchovy and cheese.
